eeg

- **Description**

EEG, MEG, LFP or any continuous data visualization tool.

- **Usage**

eeg [myeegfilein.eeg]

option :

- myeegfilein.eeg : input EEG file to load (with extension). If no file is specified, the program opens a blank window. Then select the "Load" menu to load a file.

- **Fields of parameter file and examples**

- **Examples**

- **Comments**

- **Current version**

6.171 11-09-2014

- **History**

- 6.163 01-03-2012 (PEA) : curve drawing library modification (adds file name drawing in curve attributes window).
- 6.164 03-04-2012 (PEA) : adds floating point to inter cursor time measure.
- 6.165 18-04-2012 (PEA) : adds experimental features to stable release (removes experimental branch).
- 6.166 27-04-2012 (PEA) : minor modifications due to use of libcurves map module in [erpa](#) [1].
- 6.167 27-04-2012 (PEA) : fixes an error in PDF creation when exporting curves plotting (libcurves).
- 6.168 30-05-2012 (PEA) : fixes an error when drawing isocontours of maps.
- 6.169 18-04-2013 (PEA) : adds saving of spectrogram data as continuous file (saves the power spectrum of bands (one file for each band) or saves the power of the full band). Fixes memory allocation problems in spectrogram functions.
- 6.170 11-09-2013 (PEA) : fixes a crash when closing a spatio-temporal view from curve window (in libcurves).
- 6.171 11-09-2014 (PEA) : fixes event handling (adding and visualization mode changing).

- **Files**

\$ELANPATH/bin/eeg
