eegextract

- **Description**

Extract data from a **.eeg** file and save data to another **.eeg** file.

- **Usage**

eegextract myeegfilein myeegfileout 1st_sample [last_sample]
with :

- myeegfilein : input EEG file to process (without extension).
- myeegfileout : output EEG file to process (without extension).
- 1st_sample : index of first sample (starting from 0).
- options :

last_sample : index of last sample (starting from 0). If omitted, the last sample of myeegfilein is used (i.e. the end of the file).

- **Fields of parameter file and examples**

- **Example**

- **Comments**

- **Current version**

1.01 29-09-2010

- **History**

- 1.00 27-07-2009 (PEA) : 1st version.
- 1.01 29-09-2010 (PEA) : update to use cmake and free release of Elan. Remove static allocation for reading EEG file header.

- **Files**

\$ELANPATH/bin/eegextract
